Title: On the Clouds: A New Way of Computing.

Authors: Yan Han

Source: Information Technology & Libraries

Date: 2010

Publication Type: Academic Journal

Abstract: This article introduces cloud computing and discusses the author's experience "on the clouds." The author reviews cloud computing services and providers, then presents his experience of running multiple systems (e.g., integrated library systems, content management systems, and repository software). He evaluates costs, discusses advantages, and addresses some issues about cloud computing. Cloud computing fundamentally changes the ways institutions and companies manage their computing needs. Libraries can take advantage of cloud computing to start an IT project with low cost, to manage computing resources cost-effectively, and to explore new computing possibilities.

Traditional expert (or technocratic) approaches to Technology Assessment have been fundamentally challenged by two observations. The first is that social impacts are not side effects of technology; they are core dimensions of new technology and technological development, and are a function of the co-production of technology and society. As such, they can only be understood in social, not technical terms. Secondly, technological developments are driven by particular visions for society that are normative. Because these visions (and the latent premises that underpin them) are implicit and not negotiated by society, they are, in effect, undemocratic. Participatory methods have been utilized by

An experimental power plant in New Jersey could give the black rock an attractive (and lucrative) makeover

Daniel Schrag gets visitors all the time — graduate students in despair over their dissertations, fellow faculty members dropping by to chat about the Cretaceous sulfur cycle or some equally abstruse topic, or visiting scientists collaborating with him on one of the scores of scholarly papers he has churned out in a career that has earned him a professorship in Harvard's department of earth and planetary sciences and a MacArthur genius grant.

The two men who stopped by his office one afternoon three years ago were not interested in professorial chitchat, however. Frank Smith and Jim Croyle are hard-nosed businessmen, and they wanted Schrag's advice on a major investment. Smith and Croyle are cofounders of SCS Energy a power plant development company in nearby Concord, Massachusetts, and they were planning to spend 5 billion dollars on a radical ~~new~~ new type of coal-based power plant called DurGen One. Kutipan

- Kutipan merupakan suatu bagian dari pernyataan, *statement*, atau penelitian yang telah dilakukan oleh penulis/peneliti lain maupun penulis/peneliti sendiri yang telah dipublikasikan atau didokumentasikan
- Dalam mengemukakan gagasan / menulis ilmiah **wajib** menyertakan acuan dlm bentuk kutipan (**situsi**)
- Kutipan dapat ditulis pada teks secara langsung (catatan perut) atau pada bagian akhir teks (catatan kaki)

Tujuan pembuatan kutipan

- Untuk menegaskan pendapat penulis
- Sebagai bukti perbandingan dengan pendapat penulis
- Sebagai bukti untuk membedakan dengan pendapat penulis
- Sebagai materi penyanggah oleh penulis

Jenis Kutipan

- **Kutipan Langsung**
 - penyajiannya persis sama dgn teks aslinya (yg dikutip)
 - < 4 baris (40 kata) ditulis langsung, > 4 baris dibuat baris baru menjorok lebih dalam dari teks, dengan diapit tanda petik “
- **Kutipan Tidak Langsung**
 - penyajiannya tidak sama dengan teks aslinya, melainkan menggunakan bahasa atau kalimat penulis/peneliti sendiri
 - Dalam bentuk ringkasan, simpulan, atau rujukan pokok-pokok pikiran orang lain

Kutipan langsung < 4 baris

Dari hasil penelitian yang banyak dilakukan belakangan ini berkaitan dengan kemunculan teknologi VoIP, Bill Machrone menyatakan ". . . fitur VoIP akan membuat John Dvorak sangat tertarik: nomor telepon yang akan selalu mengikuti, selama saya sambung dengan internet."(2005, hlm 53)

Kutipan langsung > 4 baris

Kemunculan sistem operasi berbasis Linux, yang dinilai sebagai ancaman bagi dominasi Microsoft dengan Windows-nya, tampaknya juga memberikan beberapa permasalahan. Seperti yang diuraikan oleh Visnu K. Mahmud:

Yang juga diperlukan dunia Linux sekarang adalah inovasi. Terlalu banyak program Linux yang merupakan jiplakan dari yang ada di Windows. Cara penggunaannya sama dan kadang-kadang menunya sangat serupa. Bahkan untuk Linux, terdapat banyak versi program untuk satu aplikasi Windows, yang dapat membuat para pengguna baru Linux kebingungan. (2000, hlm. 50)

Kutipan tidak langsung

Aplikasi GeoShare rancangan Huebner (2004) menggunakan ontologi untuk mendeskripsikan kosa kata dan catalog, juga mekanisme pencarian untuk kata kunci agar memberikan hasil pencarian yang lebih bagus.

Penelitian yang dilakukan oleh Wagener **dan** Petty (1994) menunjukkan (Wagener & Petty, 1994)

Harris et al. (2001) berargumen ...
(Harris et al., 2001)

("Mad cow," 2001)
(Inside These doors, n.d.)

Johnson berpendapat bahwa ...(seperti yang dikutip dalam Smith, 2003, hlm.102).

Definisi riset lainnya yang perlu dicermati disini adalah definisi yang dikemukakan oleh Lundberg yang disitir oleh Kumar (2005).

Jika ada kesalahan pada kutipan langsung

"Ada banyak metode yang digunakan untuk klasifikasi/ pengenalan emosi. Metode Mcgilloway, Cowie, Douglas-Cowie, Gielen, dan Stroeve (2000) membandingkan dan menguji tiga algoritma klasifikasi, yaitu *linear discriminant*, *supportive [sic!]* *vector machine*, dan kuantisasi. Metode lainnya menggunakan model fuzzy, *K-nearest neighbors* dan jaringan Syaraf." (Razak, 2008, hlm. 56)

Menggunakan tanda **[sic!]**
